100% OUTDOORS! TRAVEL BACK TO ANCIENT TIME!

This is a rare chance to see an all outdoors dinosaur exhibition in Japan! 18 full-sized robots, including all-time favorites like the Tyrannosaurus Rex and Brachiosaurus, plus a great variety of plants recreating the atmosphere of the Triassic, Jurassic and Cretaceous periods. Under the Yokosuka sky you will be able to go back in time and experience the prehistoric era! Come and loose yourself in the world of the mighty dinosaurs!

PRODUCED BY RYOICHI KANAI!

Japan's leading garden designer. This exposition unfolds on a set where Kanai's original gardening blooms. His distinctive vision brings to life the ancient scenery where once dinosaurs roamed. The set is vividly decorated with plants brought from all over Japan. It was assembled using unusual materials like logs and scrap wood, maintaining "bricolage" as its central theme. Visitors are able to enjoy a unique space, difficult to find in any other dinosaur exhibition, where Kanai's originality comes to life!
